

Sohaib Awwad

AI-Augmented Designer | Full-Stack Developer | Brand & Visual Systems
Amman, Jordan | +962 78 676 5809 | sohaibawwad8@gmail.com
Portfolio | LinkedIn | GitHub

Professional Summary

"Floppy Man" — a personal brand built on fluid movement between **UI/UX design**, frontend engineering, and product strategy, treating them as one continuous process rather than separate disciplines. Specialized in **Angular**, **TypeScript**, **ASP.NET**, and **Figma**, with proven experience shipping production-grade web applications, **bilingual design systems**, and complete brand identities. AI-orchestrated workflow with **Claude**, **Figma MCP**, and **Relume** delivers **2–3x faster** without compromising craft. Open to roles where engineering depth and design rigor converge.

Core Skills

- **Frontend:** Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS, Tailwind CSS, Responsive Design
- **Backend:** ASP.NET, RESTful APIs, C#, MVC Architecture
- **Design:** Figma, UI/UX, Graphic Design, Illustration, Logo Design, Design Systems, Wireframing, Prototyping
- **AI Tools:** Claude, Figma Make, Google Stitch, Relume, ChatGPT, Gemini
- **Dev Tools:** Git, GitHub, VS Code, Vite, npm, bun
- **Soft Skills:** Leadership, Cross-functional Collaboration, Problem Solving, Adaptability

Experience

- Access 2 Arabia (A2A)
Frontend Developer & UI/UX Designer

May 2026 – Present
Amman, Jordan

 - Develop production **React** frontends for client-facing applications, owning the full design-to-code pipeline from Figma mockups to deployed UI.
 - Design and refine user interfaces and experience flows in **Figma**, ensuring pixel-perfect parity between design files and shipped React components.
 - Apply responsive design principles, accessibility best practices, and modern frontend tooling across multiple concurrent client projects.
- Zara Paints Industrial
Graphic Designer & Social Media (University Field Training)

Mar 2026 – May 2026
Zarqa, Jordan

 - Completed mandatory university field training over 2 months, producing graphic design assets and social media content for an industrial brand.
 - Designed marketing materials, social posts, and visual communications aligned with the company's brand guidelines.
 - Gained hands-on experience translating business goals into visual content for diverse audience touchpoints.
- Fekra AI
UI/UX Designer & Brand Identity (Contract)

Feb 2026 – Mar 2026
Amman, Jordan

 - Delivered two complete logo design systems and a full design tokens library for the company's product within a focused 1-month engagement.
 - Established the visual foundation including typography, color systems, spacing scales, and component-level design tokens for scalable product design.
 - Collaborated directly with founders to align brand identity with product positioning and technical implementation constraints.
- EVO-TEAM Student Organization
Design Committee Lead & Leadership Member

Oct 2024 – Feb 2026
The Hashemite University

 - Led the entire design committee — owning every visual deliverable across UI/UX, branding, illustration, social graphics, and event materials.
 - Served as a leadership team member, contributing to strategic decision-making beyond design topics.
 - Designed the complete EVO-TEAM brand identity (logo, typography, color system) and the official website UI/UX in Figma.
 - Personally shipped the website as a production Angular/Tailwind product, eliminating design-to-code drift entirely.
 - Drove a **15%+** increase in student engagement and team visibility through cohesive design and technical execution.
- Princess Sumaya University for Technology
Full-Stack Development Intern (Paid)

Jun 2025 – Sep 2025
100-Hour Intensive Program

 - Completed a paid full-stack internship focused on **Angular** and **ASP.NET**, building production-quality applications under industry mentorship.
 - Implemented RESTful APIs in C# and integrated them with Angular frontends using proper service-layer architecture.
 - Practiced agile workflows, code reviews, and Git-based collaboration across team projects.

Featured Projects

- Cor Coffee House — Bilingual Website Design

UI/UX + Design System | Figma, AI-Orchestrated Workflow

 - Designed a complete bilingual (English/Arabic) café website end-to-end in 2 weeks — **72 unique screen states** across 6 pages, 3 breakpoints, light/dark modes, with full Arabic RTL parity.
 - Architected a production-grade design system from scratch: three-tier token architecture (Brand/Alias/Mapped), **40+ tokenized components**, and 26 utility icon sets — all variable-bound following Linear and Vercel patterns.
 - Pioneered an **AI-orchestrated workflow** using **Figma MCP**, **Claude Code**, and **Relume** for programmatic component construction — delivering senior agency-grade output as a solo operator in half the typical timeline.

- Beyond design: delivered bilingual copywriting (EN/AR), a three-tier client proposal, SEO architecture with hreflang strategy, and Next.js App Router-ready handoff.
- Design File: Figma Link.

EVO-TEAM Website

Full-Stack + UI/UX | Angular, Tailwind CSS, TypeScript

- Built a fully responsive Angular frontend with reusable components and a clean architecture supporting future feature growth.
- Outcome: **15%+** engagement increase.
- Design File: Figma Link.
- Repository: github.com/EVO-TEAM-Website

Library Management System

Vite, TypeScript, Tailwind CSS

- Built a responsive dashboard interface with client-side state management via LocalStorage and modular component design.
- Live: sohaib-awwad.github.io/Library-Management-System

Floppy Man Portfolio

Frontend + UI & Brand Identity Design | Vite, TypeScript

- Personal portfolio showcasing frontend engineering and design work, optimized for performance and accessibility.
- Design File: Figma Link.
- Live: sohaib-awwad.github.io/Portfolio

Education

The Hashemite University

Graduated: Feb 2026

Bachelor of Computer Science and its Applications

- Relevant Coursework: Software Engineering, Web Development, Data Structures, Database Systems, Algorithms.

Languages

- **Arabic** — Native Proficiency.
- **English** — Professional Working Proficiency.

Certifications

- **Claude Code — The Practical Guide** — Udemy / Academind (2026) — agentic AI development workflows.
- **Full-Stack Web Development** — Princess Sumaya University for Technology (100-hour, Angular & ASP.NET).
- **Figma UI/UX Design Advanced** — Udemy / Daniel Walter Scott (2026, 9-hour advanced program).
- **Figma Workshop (Part 1 & 2)** — Zain ZINC | **Advanced CSS & Sass** — Udemy.
- **Understanding TypeScript** — Udemy | **HTML5, CSS3 & JavaScript Fundamentals** — Code with Mosh.
